

ABDOMINAL MYOMECTOMY  
Addendum to the authorization for surgical treatment

Complications and consequences have been discussed. I understand that the risks include, but are not limited to, the following:

- Pain (immediately afterwards, delayed, long term)
- Excessive bleeding, possibly requiring blood transfusion (and its risks of infection or transfusion reaction)
- Surgical infection
- Damage to abdominal/pelvic organs such as bladder, ureters, bowel, blood vessels, nerves possibly requiring further surgery or therapy at the time of the operation or at a later date
- Formation of blood clots in the legs and subsequent risk of pulmonary embolism
- Wound breakdown of the abdominal incision, abnormal skin scar
- Hernia formation
- Formation of internal scar tissue (adhesions) causing pain, bowel obstruction, difficulties with future surgeries, or difficulty becoming pregnant
- Risk of anesthesia
- Failure to diagnose or cure the problem
- Possible need for Cesarean delivery in subsequent pregnancies
- Other:

I acknowledge that I have read and fully understand the above complications and risks, and that all of my questions have been answered to my satisfaction.
