

TUBAL STERILIZATION

Laparoscopic tubal banding
Laparoscopic tubal cauterly
Laparoscopic salpingectomy

Authorization for surgical treatment addendum

Complications and consequences have been discussed. I understand that the risks include, but are not limited to, the following:

- Pain (immediately afterwards, delayed, long term)
- Excessive bleeding, possibly requiring hysterectomy or blood transfusion (and its risks of infection or transfusion reaction)
- Surgical infection
- Damage to abdominal/pelvic organs such as bladder, ureters, bowel, blood vessels, nerves possibly requiring further surgery or therapy at the time of the operation or at a later date
- Possible further laparoscopy/laparotomy with bilateral partial/complete salpingectomy
- Failure of procedure to achieve and/or maintain sterility
- Ectopic (tubal) pregnancy
- Risk of regret, inability to reverse procedure at a later date
- Wound breakdown and bleeding
- Formation of internal scar tissue (adhesions) causing pain or difficulties with future surgeries
- Abnormal skin healing
- Risk of anesthesia

I acknowledge that I have read and fully understand the above complications and risks, and that all of my questions have been answered to my satisfaction.
